MADE IN ITALY

The most refined atmospheres in a range of colours exclusively created by mastercraftsmen of Stucco Italiano

Stucco Italiano's Colour System

Marrying Quality & Simplicity

2 COLLECTIONS, 132 COLOURS

Our Colour System is thought for the professional, following two main principles: quality of results and simplicity of use. The same System works with all our decorative products. Stucco Italiano's Colour System consists of:

- A catalogue with the 90 Stucco Italiano basic colors
- *I colori di Rosalba*, a collection of 42 exclusive colours that recall those used by the Italian painter Rosalba Carriera (1675-1757) in her works;
- A PC software to calculate the colour formulas. It is designed for Windows and can be easily installed in your computer;
- 16 base-colourants, with which you can obtain all the 132 formulas.

In the following pages are displayed all the 132 colours, in two tones (1 and 3). Other tones can be achieved by adding to the material different quantities of colour.

ALL-INCLUSIVE AND EASY TO USE

With our software, you can get the correct colour formula by simply inserting the colour of your choice, the type of material from our list of products and the quantity you wish to colour. Our Colour System works with all Stucco Italiano's products alike: both with the lime-based plasters and the decorative paints. The formula is expressed both in terms of volume (in millilitres for use with a syringe) and in terms of weight (in grams to weigh on scales).

The formula can be modified according to your needs, for instance, by indicating a lower or higher percentage to get a lighter or darker tone. The formula can also be changed by increasing or decreasing a certain hue. Each formula, including those changed, can be saved with your customer's name and kept for later use. You can even create your own colour formulas.

OUR COLOURANTS

Stucco Italiano supplies 16 base colourants in paste, with which you can obtain all the 132 colour formulas. All our colourants are of high quality, and their colouring power is guaranteed over time. The Stucco Italiano colourants are divided into:

- 9 dyes usable both on exteriors and interiors (marked with an X) of which 6 are oxides (inorganic) and 3 are synthetic (organic)
- 7 dyes usable only indoors (marked with an N)

* Since Oxide Black does not have a strong tinting power, a Carbon Black with higher tinting power is available outside of this tinting system for absolute blacks. Our Carbon Black is for indoor use only.

I COLORI DI ROSALBA

ROSALBA CARRIERA

In 2020 we have announced our second colour catalogue. We have named it "I colori di Rosalba" (*Rosalba's Colours*), honoring the Venetian painter whose works have inspired our 40 new colours.

Rosalba Carriera (1673-1757) was a Venetian Rococo portrait painter and one of the most famous European artists of the eighteenth century. She was the first female painter to initiate a new style, pioneering the exclusive use of pastel in her portraits. She was also the first to bind coloured chalks into sticks, leading to the development of a much wider range of prepared colours and expanding the usefulness of the pastel medium. Her unique style emphasized the use of spontaneous brush strokes, dancing lights, subtle surface tonalities, and a soft, elegant, and charming approach to subject matter. Her extremely delicate trait and her great ability to capture the essence of the people she portrayed made her famous in all the European courts.

Self portrait holding a portrait of her sister, 1715
